SUMMARY

Frontend Developer with 3+ years of experience specializing in the React.js and MERN stack. Proven expertise in building scalable, high-performance web applications for complex domains like logistics, e-commerce, and real-time platforms. Skilled in a modern toolkit including Redux, TypeScript, and React Native (Expo) to deliver responsive and dynamic user experiences. Adept at end-to-end feature development, from seamless API integration and rigorous performance optimization to collaborating effectively within Agile/Scrum teams.

TECHNICAL SKILLS

Frontend: React.js, React Native, Expo, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3

Micro Frontend: Vite, vite-plugin-federation

State Management: Redux, Redux Toolkit, Context API

Styling: Tailwind CSS, Bootstrap, Material-UI, SASS/SCSS

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, Mongoose

Tools: Git, Webpack, Docker, Firebase, AWS Basics

Methodologies: Agile, Scrum, CI/CD

EXPERIENCE

Frontend Developer

Sep 2022 – Present

Groupage Technologies, Chennai

- Designed and developed scalable **React.js frontend architecture** using **Vite** for faster builds and independent deployments.
- Built high-performance logistics management applications used by **1000+ daily active users**.
- Improved operational efficiency by **30%** through optimized CRUD workflows for shipment tracking and booking systems.
- Developed and maintained the **AllMasters Logistics Platform** using **React.js, Node.js, and MongoDB**.
- Built a user-friendly container booking system allowing clients to reserve shipment space easily.
- Implemented **JWT authentication** and role-based access control for secure access management.
- Integrated multiple **REST APIs** for real-time shipment data, booking workflows, and operational dashboards.

PROJECTS

AllMasters Logistics Platform — React, Node, MongoDB

- Full-stack application with JWT authentication, role-based access control, and real-time shipment tracking.
- Implemented a user-friendly booking system for clients to easily reserve container shipment space.
- Enhanced user engagement with a system for automated email/SMS notifications for critical shipment status updates.
- Integrated REST APIs to manage shipment data, booking workflows, and operational dashboards.
- [Live Application](#)

Dokonaly — React.js, Node.js, Express.js, MongoDB, Bootstrap, Material UI, JWT

- Built a comprehensive internal shipment software supporting both air and water transport logistics.
- Developed an intuitive, responsive user dashboard with Bootstrap and Material UI for seamless shipment monitoring and booking management across all devices.
- Created reusable UI components to maintain consistent design across the platform.

EDUCATION & CERTIFICATIONS

Maha Barathi Engineering Collage - Chinnasalem — CGPA: 7.3

2017–2021
